EDUCATION

B.Sc. Computer and Data Science -- Cybersecurity Major Oct 2022 - Jun 2026 (Expected)

Alexandria National University | Alexandria, Egypt

- GPA: 3.8 / 4.0
- Relevant Courses: Network Security, Information Security Management, Blockchain and Data Integrity, Database Systems

EXPERIENCE

Network Intern Oct 2025 - Jan 2026

NTI (National Telecommunication Institute) | Egypt, Remote

- Earned Cisco CCNA: Introduction to Networks credential (verified on Credly); completed 54 hands-on labs (~14 hours) using Cisco hardware and Packet Tracer.
- Configured switches, routers, and end devices; applied IP addressing, Ethernet fundamentals, and data-link layer protocols.
- Skills: Network Infrastructure, Network Services, TCP/IP, Cisco CLI, Packet Tracer.

Quantum Computing Intern Jun 2025 - Sep 2025

Alamein International University (AIU) | Online, Remote

- Completed 12-week programme: 20 hours of lectures and 30 hours of hands-on programming labs covering quantum gates, circuits, and algorithms.
- Completed a dedicated self-study period and delivered a final project applying quantum computing concepts.

Linux System Administration - Levels 1 and 2 Jul 2024 - Sep 2024

Information Technology Institute (ITI) | Alexandria, Egypt

- Administered Red Hat Enterprise Linux (RHEL) systems: users, groups, permissions, services, networking, and task automation via Bash scripting.
- Applied system-hardening techniques including SELinux policies, firewall rules, and access control management.

Front-End Web Developer (Training) Jan 2024 - May 2024

SEF Academy | Remote

- Built responsive web applications using HTML5, CSS3, and JavaScript; introductory Node.js and SQL experience across team-based projects.

PROJECTS

Wazuh SIEM/XDR - Graduation Project 2025 - 2026

Alexandria National University | github.com/Karim-A-37/Wazuh

- Deployed Wazuh open-source SIEM/XDR across a multi-agent lab environment simulating an enterprise network.
- Designed detection rules for brute force, privilege escalation, and lateral movement; performed log ingestion, correlation, and IOC analysis.

- Produced structured incident reports and full lab documentation on GitHub.

INE Penetration Testing Lab Track2026 - Present

INE Security / TryHackMe / Personal Labs / HackTheBox

- Practising reconnaissance, scanning, exploitation, and post-exploitation techniques aligned with the eJPT curriculum.
- Working through CTF challenges to build a practical offensive skill set alongside final-year studies.

TECHNICAL SKILLS

Offensive Security: Penetration Testing, Nmap, Metasploit (basic), Web Application Testing, Vulnerability Assessment

Defensive Security: Wazuh SIEM/XDR, Threat Detection, Incident Response, Log Analysis, System Hardening, IOC Analysis

Operating Systems and Networking: Red Hat Enterprise Linux, Ubuntu, Bash Scripting, SELinux, TCP/IP, Cisco CLI, Packet Tracer, Wireshark

Programming and Development: Python, SQL, JavaScript, HTML5, CSS3, Node.js, Git, GitHub

CERTIFICATIONS AND TRAINING

EARNED:

- CCNA: Introduction to Networks - Cisco (NTI, Jan 2026) - Credly Verified
- Quantum Computing Certificate - Alamein International University (Sep 2025)

IN PROGRESS:

- eJPT - Junior Penetration Tester - INE Security (2026)
